The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/781,539	Applicant(s) CHUNG, CASEY	
	Examiner Thomas M. Sember	Art Unit 2885	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 29-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Hamilton '575. Hamilton '575 discloses a method, comprising the steps of: providing a light source 11 mounted within a light fixture¹⁰, the light source 11 including opposed first and second longitudinal ends such that a longitudinal axis may be defined between the longitudinal ends and a vertical plane may be defined transverse to the longitudinal axis; and using a light shield 15 including a center and an outer edge to decreasingly shield a percentage of the light source along a path from the center to the outer edge, wherein the coverage area of the shield incrementally decreases in a series of at least three steps (several steps 18 shown in figure 3) from the center to the outer edge. See column 2, lines 48+.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 31-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hamilton '575. Hamilton '575 discloses the claimed invention except for the teaching of the specific light quantities and light angles. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the light angle and quantity of light output of Hamilton '575 to be within applicant's claimed boundaries since such a modification would be within reasonable experimentation to one having ordinary skill in the art of distributing light more efficiently along an elongated light source.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Taylor '141 and Cooney et al '212 discloses lighting assemblies which are similar to applicant's invention.
